

## ABSTRACT

### WIRELESS LAN MEASUREMENT FEEDBACK

5           Measured data, such as WLAN data, are received. The measured data are  
compared with expected data, such as expected WLAN data. Expected WLAN data can  
be generated from various sources, for example floor plan data and access point data (e.g.,  
quantity, placement, and/or configuration). Based on such measured data, WLAN features  
can be changed, such as floor plan and/or access point data (e.g., quantity, placement,  
10 and/or configuration).
